

**Design a web application based on the details given below. Time : 2 :30 HRS**

**(Any Kind of Malpractice will be immediately redirected to HR)\**

**Instructions**

1. No folders should be opened during the diagnostics
2. During the diagnostics, Internet contents should not be used or referred.
3. Only reference to previous assignments is allowed.
4. ION should be used only for uploading assignments, other than that contents in ION should not be referred.
5. All associates should only upload their assignments in ion Activities link enabled for you.

**Page 1(CustomerHome.jsp)**

Customer Home

[View All Customers](#)

When the user clicks **View All Customers**, Page2 will appear with displaying all the details of customers given below. The business criteria in displaying the details are, delete action can be performed for the customer whose status is Temporary. For the other customers(Permanent) delete link should not appear and in place of delete link, NA should appear

**Page 2(CustomerDetails.jsp)**

<u>Customer Details</u>				
CustId`	Name	ContactNo	Status	Action
121	XYZ	9888888888	Temporary	<a href="#">Delete</a>
122	ABC	9999999999	Permanent	NA

When the user clicks the delete button another page will appear displaying all the details of particular customer with two buttons ok or cancel. When user clicks the ok button, details of the particular customer will be deleted. If user clicks the cancel button, it will be redirected to Page2(CustomerDetails.jsp) with displaying all the details of customer

<u>Confirmation</u>	
CustId	121
Name	XYZ
Contact No	9888888888
Status	Temporary
<input type="button" value="OK"/>	<input type="button" value="Cancel"/>

**Design the whole application using MVC pattern and the proper database tables can be designed with fields and the values given below.**

CustId` (Vracha2(20))	Name(Varchar2(50))	ContactNo(Nu mber(10))	Status(Varchar2(20))
121	XYZ	9888888888	Temporary
122	ABC	9999999999	Permanent

===== **ALL THE BEST**=====
